This is in response to Applicant's request filed on December 12, 2002.

Claims Status

Claims 1-33 are pending.

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2171

2. Claims 1-33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-29 of U.S. Patent No. 6,415,277. Although the conflicting claims are not identical, they are not patentably distinct from each other because the independent claims of the present application, namely claims 1, 18 and 32, replace “a corporate database” previously presented in the U.S. patent 6,415,277 by “a corporate human resources database”. The addition of the word “human resources” in the presented claims does not prevent occurrence of producing a printed product in response to changes to a database. Therefore, one of ordinary skill in the art at the time of the invention would have found it obvious to substitute the corporate database of the U.S. Patent 6,415,277 with a human resources corporate database because that would have allowed production of printed product be made for specific department of a corporation. Also, Omission of element and its function in combination is obvious expedient if remaining elements perform same function as before. In re KARLSON, 136 USPQ 184 (CCPA 1963). In this case, the same function of producing a printed product in response to changes in a database is achieved in both the U.S. Patent 6,415,277 and the present application.
